

DATA CLEANING PROCESS IN EXCEL

INTRODUCTION

- This project focuses on the analysis and cleaning of a Restaurant Health Inspection data from New York City (NYC). The dataset contains information about restaurant inspections, including restaurant details, cuisine descriptions, inspection results, food safety grades, and violation types across different neighborhoods in the NYC. During the inspection of the dataset, several inconsistencies and discrepancies were identified, such as missing values, duplicate entries, incorrect formatting, and inconsistent records.
- Excel data cleaning techniques were applied to improve data accuracy, consistency, and reliability of the data before analysis and visualization.
- The data cleaning process involved identifying and correcting errors, standardizing formats, handling missing data, removing duplicates, and organizing the dataset for meaningful analysis.
- The cleaned dataset can then be used to identify patterns in restaurant violations, inspection grades, and cuisine performance to help support better public health decisions and food safety management in New York City.

DATA CLEANING PERFORMED

COLUMNS	ISSUE(S) FOUND	CLEANING METHOD	RESULTS
CAMIS	Duplicate records were detected	Used "remove duplicates in excel"	Duplicate entries were removed
DBA	Extra spaces, mixed upper and lower case entries, and Inconsistent values were detected.	TRIM function, UPPER function to standardize text format, Filtered and deleted inconsistent records.	Clean text formatting, Consistent and properly formatted, Inconsistent values were removed.
BORO (LOCATION)	Irregular data patterns	Reviewed records using filtering, formatting and deleting tools	Improved data consistency
BUILDING	Blank cells Irregular data patterns	Filled missing values, Reviewed records using filtering, formatting and deleting tools	Complete records Improved data accuracy

COLUMNS	ISSUE(S) FOUND	CLEANING METHOD	RESULTS
STREET	Extra spaces, mixed upper and lower case	TRIM function, UPPER function to standardize text format.	Clean text formatting, Consistent and properly formatted.
ZIPCODE	Blank cells	Filled in blank cells as "0" using filtering tool	Complete records
PHONE NUMBER	Blank cells Irregular data patterns	Filled blank cells as "0" using filtering tools, "Select and replace" tool to remove irregular data patterns.	Complete records, Improved data consistency.
CUISINE DESCRIPTION	Blank cells	Filled blank cells and labelled as "any"	Complete records
INSPECTION DATE	none	none	Complete records

COLUMNS	ISSUE(S) FOUND	CLEANING METHOD	RESULTS
ACTION	Blank cells	Filled blanks as "Not yet inspected"	Complete records
VIOLATION CODE	Blank cells	Filled blank cells as "not available"	Complete records
VIOLATION DESCRIPTION	Blank cells	Filled blanks as "not available"	Complete records
CRITICAL	none	none	Complete records
SCORE	Blank cells	Filled blanks as "00"	Complete records
GRADE	Blank cells	Filled blanks as "not available"	Complete records
GRADE DATE	Blank cells	Filled blanks as "not issued"	Complete records

COLUMNS	ISSUE(S) FOUND	CLEANING METHOD	RESULTS
RECORD DATE	none	none	Complete records
INSPECTION TYPE	Blank cells	Filled blanks as "not identified"	Complete records
LATITUDE	Blank cells	Filled blanks as "0"	Complete records
LONGITUDE	Blank cells	Filled blanks as "0"	Complete records
COMMUNITY BOARD	Blank cells	Filled blanks as "0"	Complete records
COUNCIL DISTRICT	Blank cells	Filled blanks as "0"	Complete records

COLUMNS	ISSUE(S) FOUND	CLEANING METHOD	RESULTS
CENSUS	Blank cells	Filled blank cells as "0"	Complete records
BIN	Blank cells	Filled blank cells as "0"	Complete records
BBL	Blank cells	Filled blank cells as 0"	Complete records
NTA	Blank cells	Filled blank cells as "unknown"	Complete records
